**Book Description (annotation)..**

Based upon the scientific and symbolic properties of light and color, the archetypal themes and patterns discussed in this work confirm the presence of a collective 'universal language' rooted deep in the human psyche. But this language has too long been ignored.

Raising tough but crucial questions about our origins and purpose as a species, *The Color of Truth Vol I* lays the foundations for a clear and logical alternative to the many conflicting belief systems - both secular and religious - that plague our world today.

**From the rear cover..**

"An extraordinary work which amounts to a *theory of everything*..  
 ..the philosophical equivalent of quantum physics string theory..  
 ..astounding in its breadth and depth.."

Prof. Colín O Brainin, Psychologist, Univ. of Limerick

"Revelatory.. moves the theological-philosophical debate to new heights.  
 Offers the religions of the world and political ideologies a way forwards."

Prof. H Dillon-Malone, Dublin, Ireland
