Book Description (annotation)..

Based upon the scientific and symbolic properties of light and colour, the archetypal themes and patterns discussed in this work confirm the presence of a collective 'universal language' rooted deep in the human psyche. But this language has too long been ignored.

Raising tough but crucial questions about our origins and purpose as a species, *The Colour of Truth Vol 1* lays the foundations for a clear and logical alternative to the many conflicting belief systems - both secular and religious - that plague our world today.

From the rear cover..

"An extraordinary work which amounts to a *theory of everything*.. ..the philosophical equivalent of quantum physics's string theory.. ..astonishing in its breadth and depth.."

Prof. Coilin O Brainin, Psychologist, Univ. of Limerick

".. moves the theological-philosophical debate to new heights. Offers the religions of the world and political ideologies a way forwards."

Prof. H Dillon-Malone, Dublin, Ireland
