

**Standard copyright notice for CheckPoint Press e-books: instructions for authors and book designers**

Please copy and paste the information below the dotted line, duly amended (in black text) onto one of the first two interior pages of your e-book before creating and/or uploading your e-book file to CheckPoint Press. You may change the font type and size, and paragraph formatting as required.

The copyright time-range may be entered as just one date (the year when this e-book was launched) or, as a date-range that encompasses the times between any original 'parent' print version being published, and this e-book version. The main title should be entered as ALL CAPITALS and the subtitle (if any) with Leading Capitals On Every Word.

\*Select the type of e-book file that is being created. If you are not sure—or don't know—simply leave the word 'e-book' and delete the other options. If there are other CheckPoint Press versions in existence (such as previous print editions or different e-book formats with different ISBN's) you may also want to add this information as indicated – if you wish. But it is only (i) the 'parent' print-version ISBN that is statutorily required, as well as (ii) the unique identifying ISBN for this particular e-book.

Naturally, if your e-book does not have a 'parent' print version, then that entry should be deleted.

Please see <http://checkpointpress.com/ebookservices.htm> for further information if required.
